

TUXEDO

ACADEMY

**George Grant Mason School
George F. Baker High School**

“America needs a world-class STEM workforce to address the grand challenges of the 21st century, such as developing clean sources of energy that reduce our dependence on foreign oil and discovering cures for cancer” (John Holdren |White House Science Advisor)

The Tuxedo Union Free School District seeks to provide every student with a unique educational opportunity available through a STEM education by focusing on the processes and practices incorporated in Science, Technology, Engineering, and Mathematics as it applies to problem solving, collaboration, and ingenuity. We believe that every student can and will benefit from this unique educational opportunity and the skills developed in our program will be relevant in not just Science, Technology, Engineering, and Mathematics, but to all fields of study.
